

New Premium Zirconia Products (BORA-6)

BORA-6 using a special backing with outstanding durability provides stability in high loads and tension.

Applied new type of additive provides Up-graded grinding performance than typical Zirconia Products.

In addition, grinding aluminium shows higher grinding performance than **150%** of the general Zirconia products.

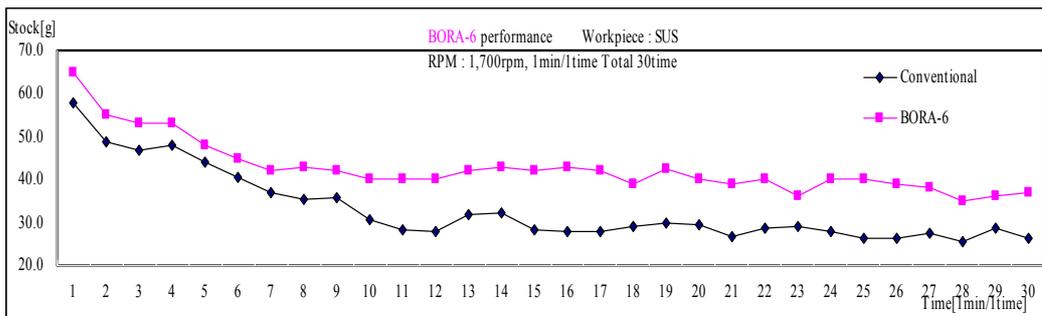

Premium Zirconia Product Structure

DEERFOS's BORA-6

Benefits for customers...

Since it has an excellent grinding performance, persistence is the expression of high grinding efficiency.

It provides productivity and energy savings.

Application

- Dry Sanding, Grinding of seam welds
- Deburring of forgings or castings
- High pressure heavy duty grinding

Workpiece

- Titanium, Malleable cast iron, Rotors and blades
- Air jet blades, Low Carbon steel, High cobalt,
- Nikel alloys, Aluminium
- SUS300 series (Stainless steel), Heavy deburring

Available sander/grinder

- Back stand grinder, Swing grinder
- Stationary or portable belt grinder
- Conveyorized belt grinder, Centerless grinder
- Automatic rotary type grinder

Premium series BORA-6

- Available in grades : P24 ~ P120
- Backing : 100% Ywt Polyester
- Resin system : Resin / Resin
- Product form : Narrow & Wide belt / Roll/discs
- Coating State: Super size coat & grinding efficiency of the new grinding additives
- Grain : Premium Ceramic Grain
- Manufactured width : 1,380mm

Premium series

BORA

BORA is purple in Korea.
